

ISC Shock Absorber

Version

Racing / Drift

Without too much rebound which to handle exactly, maximum grip and traction for your driving.

With pillow ball upper mount allow you to handle different condition of road in high performance.

Street Sport

It was feature of high performance with comfortable for your driving. The ultimate upgrade to street car. Featuring 32 levers of damper fore adjustment, full height adjustment, these damper kits are then perfectly matched to all car models.

Street Comfort

Innovative technology develops the extremely comfortable shock absorber for customers to handle the bumpy surface on the street stably.

Street Comfort / Street Sport

32 Damping Adjustable

Enable to control the damp valve precisely and drive smoothly on all road surfaces.

Forged Upper Mounts

The T6061 Forged Upper Mounts designs can increase the product artisticly, reduce the suspension system's load-bearing weight, increase the driving manoeuvring.

SAE9254 SPRING

Made of SAE9254 steel, tested by over than 600,000 times compression inspection, deformation less than 5%. High strength sophisticated surface dealing, durability was highly improved.

Mono-tube Design

Larger cylinder and piston design to advance driving stability and dexterity.

Electroplated with nickel to resist rust.

Ride-Height Adjustable

To give your car absolutely superb road holding qualities and great looks as well.

Steel Bracket

The drill tubing support's design like original factory design may cause the drill tubing stable installment equally on the shock absorber even more forcefully vehicle's security, the unique tray design, may cause the tray and under a place closer fitting, increases the product durability.

Racing / Drift

32 Damping Adjustable

Enable to control the damp valve precisely and drive smoothly on all road surfaces.

Pillow ball Upper Mount (Optional)

With pillow ball upper mount can improve the tire grip and steering response.

On McPherson strut which pillow ball upper mount is able to adjust camber degree make your driving in high performance.

The new design thrust bearing for camber plate which to prevent the noise from your driving.
