

# ISC

## Suspension

No one can drive without ISC

[www.isc-nl.com](http://www.isc-nl.com)

# ISC Shock Absorber

## Version

### Racing / Drift

Without too much rebound which to handle exactly, maximum grip and traction for your driving.

With pillow ball upper mount allow you to handle different condition of road in high performance.

### Street Sport

It was feature of high performance with comfortable for your driving. The ultimate upgrade to street car. Featuring 32 levers of damper fore adjustment, full height adjustment, these damper kits are then perfectly matched to all car models.

### Street Comfort

Innovative technology develops the extremely comfortable shock absorber for customers to handle the bumpy surface on the street stably.

# Street Comfort / Street Sport

## 32 Damping Adjustable

Enable to control the damp valve precisely and drive smoothly on all road surfaces.

## Forged Upper Mounts

The T6061 Forged Upper Mounts designs can increase the product artisticly, reduce the suspension system's load-bearing weight, increase the driving manoeuvring.

## SAE9254 SPRING

Made of SAE9254 steel, tested by over than 600,000 times compression inspection, deformation less than 5%. High strength sophisticated surface dealing, durability was highly improved.

## Mono-tube Design

Larger cylinder and piston design to advance driving stability and dexterity.

Electroplated with nickel to resist rust.

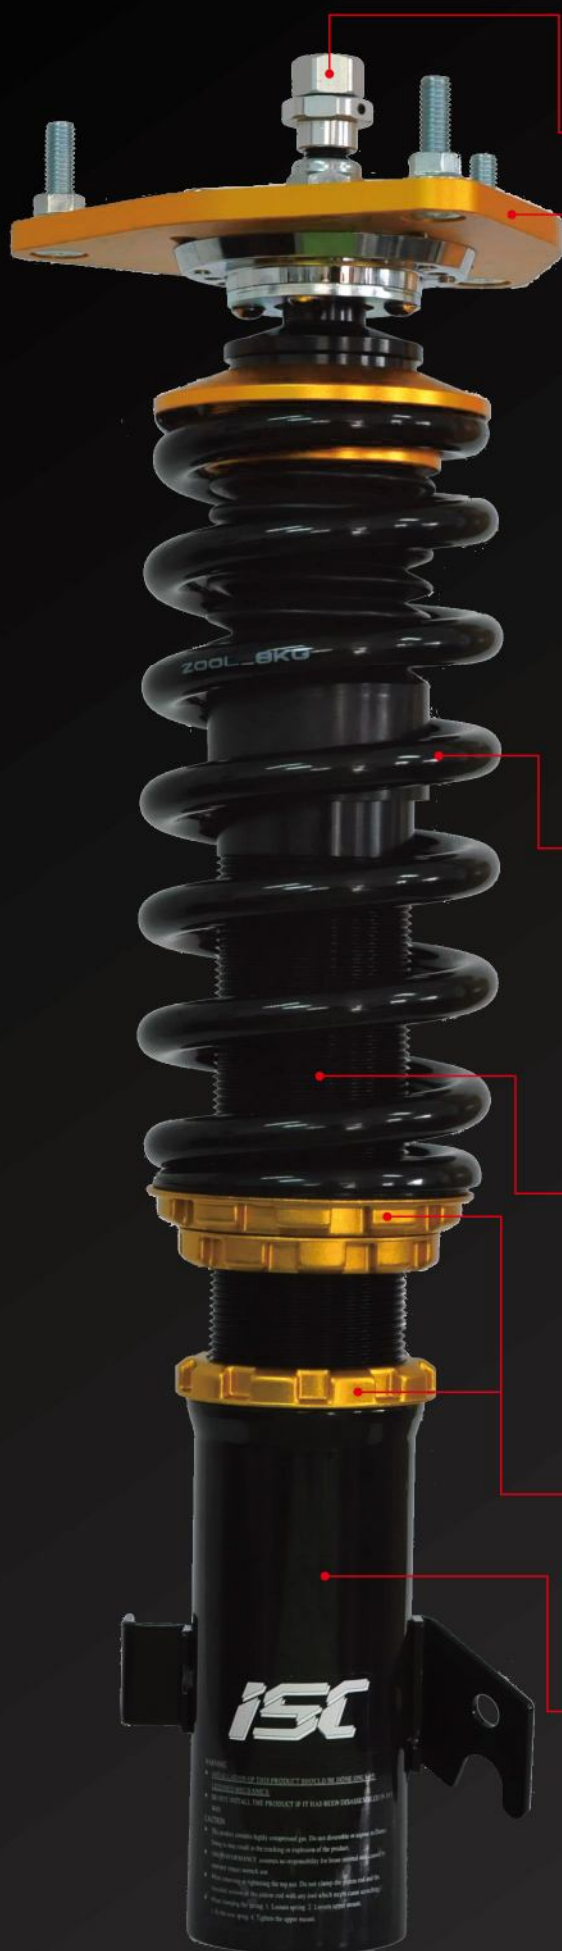

## Ride-Height Adjustable

To give your car absolutely superb road holding qualities and great looks as well.

## Steel Bracket

The drill tubing support's design like original factory design may cause the drill tubing stable installment equally on the shock absorber even more forcefully vehicle's security, the unique tray design, may cause the tray and under a place closer fitting, increases the product durability.

# Racing / Drift

## 32 Damping Adjustable

Enable to control the damp valve precisely and drive smoothly on all road surfaces.

## Pillow ball Upper Mount (Optional)

With pillow ball upper mount can improve the tire grip and steering response.

On McPherson strut which pillow ball upper mount is able to adjust camber degree make your driving in high performance.

The new design thrust bearing for camber plate which to prevent the noise from your driving.

## SAE9254 SPRING

Made of SAE9254 steel, tested by over than 600,00 times compression inspection, deformation less than 5%, High strength sophisticated surface dealing, durability was highly improved.

## Mono-tube Design

Larger cylinder and piston design to advance driving stability and dexterity.

Electroplated with nickel to resist rust.

## Ride-Height Adjustable

To give your car absolutely superb road holding qualities and great looks as well.

## Steel Bracket

The drill tubing support's design like original factory design may cause the drill tubing stable installment equally on the shock absorber even more forcefully vehicle's security, the unique tray design, may cause the tray and under a place closer fitting, increases the product durability.

# ISC Mini 6-pot Brake Kits

## MINI 6-POT CALIPER

- Material: T2024 aluminum alloy forged.
- Coating: 4 layer nanotech coating for anti high temperature.
- Pot dimension: 32. 32. 28mm
- Fluid passage: Inner loop and mono pressure valve design.

## ONE-PIECE ROTOR

Specification: 286mm, 302mm, 320mm  
 Made of FC-28 with lots of Nickel and Chrome alloy to increase the stability in the heat. Beside, surface treatment on the Oxidation resistance can strengthen the rotor anti-corrosion.

## 320mm FLOATING ROTOR

Specification: 320mm  
 Made of FC-28 with lost of Nickel and Chrome alloy to increase the performance. The maximum endured temperature is 925°. Beside the hat is made of T7075 with separating and floating designed can be effective to isolate the heat expansion.

## BRAKE LINE

Teflon® inner tube imported from Italy, cover silicon hose offered the maximum protection against rubbing. The double-decked stainless steel throws over duplicate causes the compressive strength to be possible to amount to 3000 pounds.

## BRACKET

High strength steel with high temperature electric-coating treatment to prevent it from acid and corroding. Beside, it won't be twisted and warped by the frequency vibration of braking.

## BOLT

The super hardness and toughness bolt is forged and made of chrome-molybdenum steel. The hard coating on the thread avoid the danger of falling off and resist the acid and rust.

## BRAKE PAD

The unique design to avoid the noise and remove the dust faster, beside, make the pad and disc bite closely.

Color	Work Temperature	μ	Material
Silver	50~650 °C	0.51	Pottery + Carbon
Red	100~700 °C	0.55	Pottery + Alloy
Golden	270~800 °C	0.55	Pottery + A lloy
